

## Production Specification

|                                       |                      |
|---------------------------------------|----------------------|
| Antenna Name                          | CS-900/1800-5X-1.6H  |
| <b>Main Electrical Specifications</b> |                      |
| Frequency Rang (MHz)                  | 870~960/1710~1880MHz |
| V.S.W.R                               | ≤2.0                 |
| (dB) Gain                             | 2.0±0.5              |
| Polarization                          | Vertical             |
| Zo(Ω) Impedence                       | 50                   |
| <b>Main Structure Specifications</b>  |                      |
| Size (mm)                             | ∅42×316              |
| Connector Type                        | SMA Male             |
| Cable Name and Length                 | RG174 / 5±0.25m      |
| Fix Type                              | Alnico               |
| Color                                 | Black                |
| <b>Environment Specifications</b>     |                      |
| Operation temperature                 | -40~+70°C            |
| Operation humidity                    | 55%~95%              |

### Exterior and Size- V.S.W.R
