Power Notice

1. The device is a power-required device, it means, it will not work till it is powered. If your networks should active all the time, please consider using UPS (Uninterrupted Power Supply) for your device. It will prevent you from network data loss or network downtime.
2. In some area, installing a surge suppression device may also help to protect your Fast Ethernet Switch from being damaged by unregulated surge or current to the Switch or the power adapter.

- 6 -

Step 4: Connect your Fast Ethernet Switch to network devices.

- A. Connect one end of a standard network cable to the 10/100 RJ-45 ports on the front of the Fast Ethernet Switch.
- B. Connect the other end of the cable to the network devices such as printer servers, workstations or routers...etc.

Step 5: Supply power to the Fast Ethernet Switch.

- A. Connect one end of the power cable to the Fast Ethernet Switch.
- B. Connect the power plug of the power cable to a standard wall outlet.
