## NEW DEVICE WITH SMART FEATURES

### UNIVERSAL GSM DIALER

GECON - 7 is a professional GSM communicator with voice messages, which can be connected to any PSN control panel. It builds on GECON Lite Plus switch extended functionality and preserved original features

Its main function is transmission of signals via the GSM network from the control panel to the pre-set numbers via SMS or call. It can be also used to control various industrial facilities or to manage home appliances etc..

#### Features

- ✓ 7 programmable inputs
  - alarm / state
- ✓ voice message for each input
- ✓ 1 relay
  - managed by SMS
  - GSM key function
  - Problem
- ✓ facility control by SMS
- ✓ output to 3 ext. relays
- ✓ on-line printing assessment
- ✓ simple set up

#### Use

- ✓ Connection to PSN control panel – sending messages on alarm, defects, fire, state of the backup battery
- ✓ Remote control – via SMS controls 1 to 4 electrical appliances
- ✓ Monitoring of technological facilities – power or heating outage etc.
- ✓ Emergency calls connection of radio PA (DOZ-102L)
- ✓ Garage door control
- ✓ Monitoring of water tanks

#### Technical parameters

- Integrated GSM module for zone 900/1800/1900 MHz
- Power supply 8 - 18 V
- Quiescent current consumption 25mA at 12V / communication 250mA
- 7 - inputs, 1 - output (relay)
- size 80 x 60 x 20 mm, temp. scale -10 °C to +55 °C
- External SMA antennas
